WORK EXPERIENCE

- Cyber Security Intern, IIITD with APSHE and Blackbucks Engineering virtual Internship** 07/2024 – 09/2024
Tirupati, Andhra Pradesh, India
- Conducted over 20 penetration tests using Metasploit and Burp Suite.
 - Identified and reported 10+ critical vulnerabilities, including SQL injection and misconfigured authentication mechanisms
 - Performed detailed log analysis and network traffic monitoring to trace attack patterns, suspicious activities, and potential intrusion attempts.
- Teacher, Candid Career Secondary School** 05/2022 – 08/2022
F091, Suryabinayak, Nepal
- Taught 100+ students in Computer Science, Mathematics, and Science (Grades 6-10).
 - Provided mentorship and guidance to improve students' technical skills.
 - Designed 5+ interactive lesson plans integrating Information Technology and Cybersecurity concepts.

PROJECT

- Automated Vulnerability Scanner, (Python, Metasploit)**
- Built a custom automated vulnerability scanner integrating Nmap + Metasploit.
 - Reduced manual vulnerability assessment time by 60%.
 - Detected 15+ security flaws in a simulated enterprise network.
 - Logged results in a structured format similar to SOC alert reports.
- Server Administration & Active Directory Setup, L&T EduTech Submission**
- Configured Active Directory and implemented Group Policies for security hardening.
 - Enforced password policies, authentication rules, and disabled insecure configurations.
 - Simulated a multi-user enterprise environment using VirtualBox.
- Malware File Classifier, ML-Based PE Malware Detection System**
- Built an end-to-end static malware detection system using **LIEF + EMBER features (2,300+ features)**
 - a **model achieving ~98% accuracy** (3 model used)
 - Developed a **Flask REST API backend and React (Vite) frontend** for real-time file scanning with sub-100ms inference latency

CERTIFICATES

- | | | |
|---|---|---|
| - Linux System Administration - Certification L&T Edutech | - Secure Networking - Certification by L&T Edutech | - Detecting Web Attacks  Lets Defend |
| - MITRE ATT&CK Framework- By Lets Defend | - Phishing Email Analysis  Lets Defend | - Malware Analysis Lets Defend |

EDUCATION

- Bachelor in Computer Science & Engineering (Cybersecurity Specialization),** 11/2022 – 2026
Jawaharlal Nehru Technological University (SVCET) Anantapur, India
- CGPA: 8.20

AWARDS

- HTB ACOLYPSE CTF 2025 Hack The Box**
173 Global Rank
